

Help and Documentation

All MATLAB® functions have supporting documentation that includes examples and describes the function inputs, outputs, and calling syntax. There are several ways to access this information from the command line:

- Open the function documentation in a separate window using the `doc` command.

```
doc mean
```

- Display function hints (the syntax portion of the function documentation) in the Command Window by pausing after you type the open parentheses for the function input arguments.

```
mean(
```

- View an abbreviated text version of the function documentation in the Command Window using the `help` command.

```
help mean
```

Access the complete product documentation by clicking the help icon .
